

2020-2021

Advanced Foot Care

Program Overview

The advanced foot care program combines independent study and assignments with instructor-led theory and clinical practice. Students will learn assessment and treatment of the ailments of the foot, as well as how to care for high-risk clients. Other topics include standards for sterilization protocols, accepted procedures for foot care nurses, record management, interdisciplinary care, and independent practice. At the end of this course, the student will be prepared to provide foot care in either private practice or in a health care setting.

Career Potential

This program provides specialty education for the practitioner to work in their own independent practice or within public health in areas of specialized foot care.

Admission Requirements

- active licensure in Canada as an licensed practical nurse, registered nurse, or nurse practitioner, and license in good standing
